# Google Cloud Platform (GCP) OFFERINGS

Overview: What is GCP and why it is getting popular?

- Google Cloud Platform (GCP), offered by Google, is a suite of cloud computing services that runs on the same infrastructure that Google uses internally for its end-user products.
- GCP provides infrastructure as a service, platform as a service, and serverless computing environments.

- Highest growing cloud platform

- More customer-friendly pricing models and discount models

- Offers considerable scaling and load balancing capabilities

- Plays nicely with other Google service and products

- Excellent support for containerized workloads
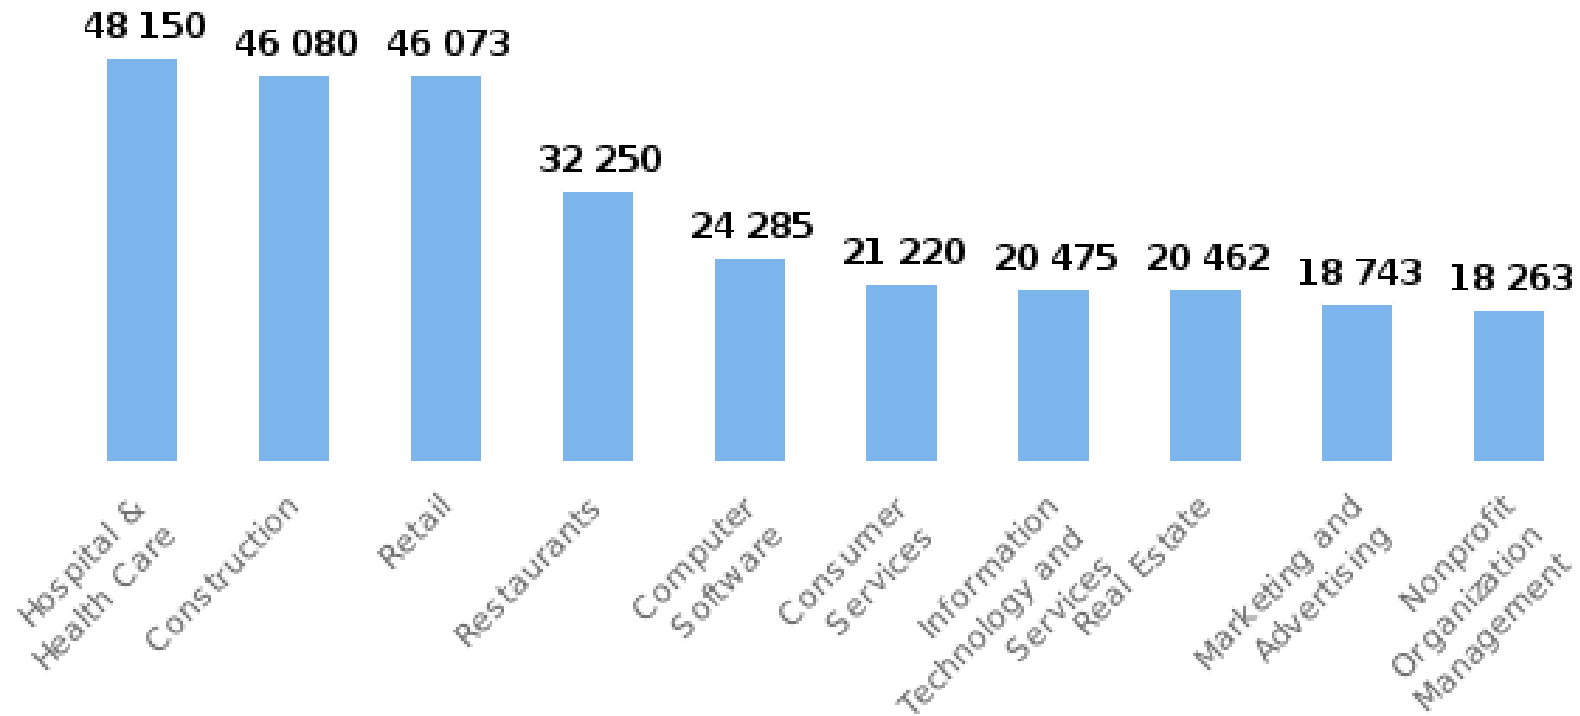

- Global fiber network

Google Cloud Platform Market Share

As of Q4 2021, the Google Cloud market share is 9% worldwide. That puts it in 3rd place, behind AWS and Microsoft's cloud service Azure.
